POLICY CONTENT

Introduction and Objective

The companies of the Petrone Group are committed to ensuring that the procurement process for goods and services aligns with **environmental, social, and economic sustainability principles**, reducing negative impacts and promoting responsible practices.

Through innovation and collaboration, we want our procurement function to act as a catalyst for change, activating virtuous dynamics throughout the value chain and becoming a key player in the transition to a more equitable, resilient, and regenerative system.

Scope

This policy applies to all companies within the Group and covers the procurement of both direct and indirect goods and services.

The approach includes both core and non-core supply chains, with the goal of obtaining a comprehensive, structured, and controlled view of risks, while promoting shared paths for improvement.

General Principles

- **Reduction and optimization:** Limit the purchase of new goods, favoring reuse and sharing;
- **Product life cycle:** consider the environmental and social impact throughout the entire life cycle of purchased goods;
- **Centralization and control:** manage procurement efficiently to minimize waste, optimize resources, and maximize quality;
- **Shared responsibility:** build supplier relationships based on mutual responsibility and active engagement toward sustainability goals;
- **Transparency and continuous improvement:** Go beyond basic compliance by fostering a culture of transparency, ethics, and responsible innovation.

Sustainability Criteria

- **Environmental**
 - Preference for suppliers with environmental certifications;
 - Purchase of products certified with recognized ecolabels (eg. Ecolabel, FSC);
 - Preference for goods made from recycled materials and/or renewable energy sources;
 - Reduction in the use of disposable products and preference for compostable or recyclable products and packaging;
 - Calculation of Scope 3 emissions related to the supply chain and implementation of concrete emission reduction plans.
- **Social**
 - Selection of partners who ensure respect for human rights, dignified working conditions, and safety standards;
 - Monitoring working conditions throughout the supply chain in accordance with social responsibility requirements.

	Green Procurement Policy
Date of issue: May 16, 2025	

- **Governance**

- Collaboration with suppliers who act with integrity, comply with anti-corruption regulations, and adopt high standards of legal compliance;
- Promotion of a culture of transparency and ethics in business agreements.

- **Economic**

- Strategic procurement planning to reduce waste and inefficiencies;
- Definition of framework agreements that promote advantageous conditions and long-term partnerships;
- Periodic evaluation of supplier performance in terms of quality, cost, delivery times, and ESG parameters.

Monitoring and Evaluation

- Systematic ESG-based mapping of the supply chain using methodologies and tools in collaboration with partners such as EcoVadis;
- Implementation of a supplier evaluation system to monitor and drive continuous improvement;
- Use of satisfaction questionnaires to gather feedback on purchased goods and services;
- Continuous alignment with the UN 2030 Agenda Sustainable Development Goals.

Conclusion

This policy reflects the Petrone Group's commitment to a sustainable future.

With a resilient, transparent, and responsible supply chain, we aim to transform the procurement process into a key driver for promoting an advanced business model where sustainability is the guiding principle of every strategic and operational decision.
